Folder `CH DemoVault`

First Look with Minimal Theme

First glance in demo folder, can see kanban boards, not dashboard yet. Also they look a little funky with the title not being in line with the first column?

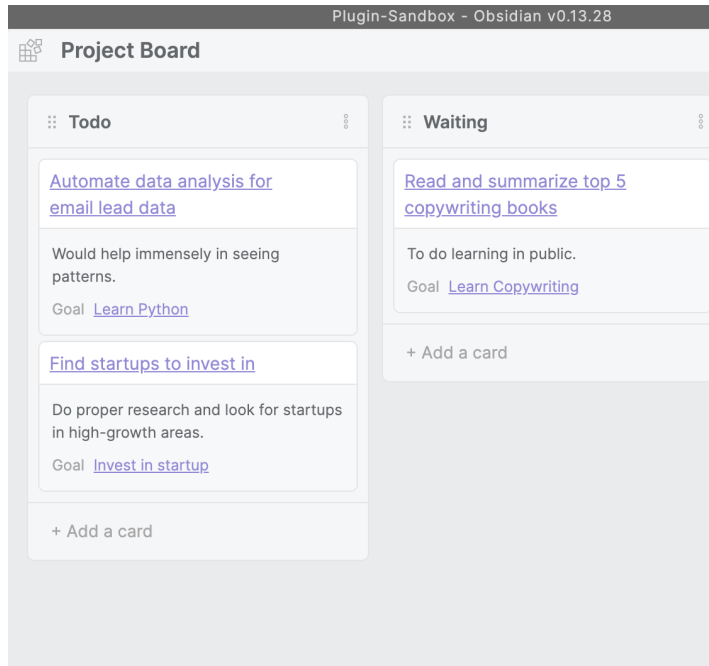

Dash looks better now that I followed config guide:

Minimal on Mobile

Default Theme

How does this all look if I don't use Minimal? I change my theme a lot…
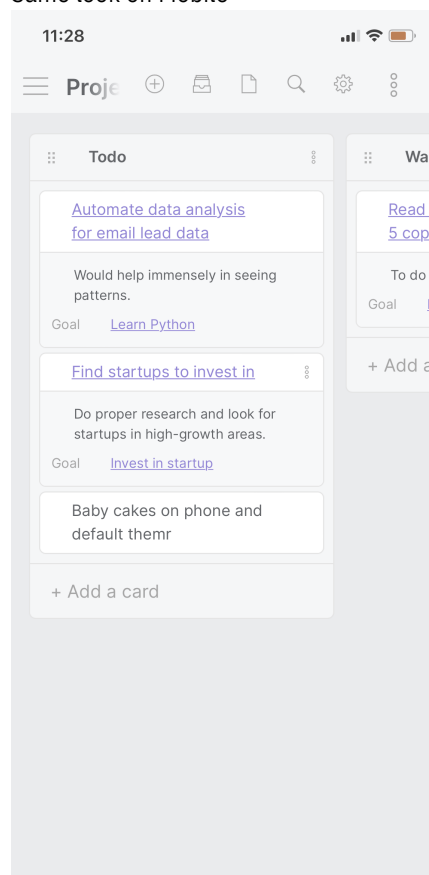

Boards seem ok:

Dash is less pretty but I assume functional

## Sanctum Theme

Was messing with this of late and the dash looks nice actually. Because there is support for this? Cards look this way because of... why?
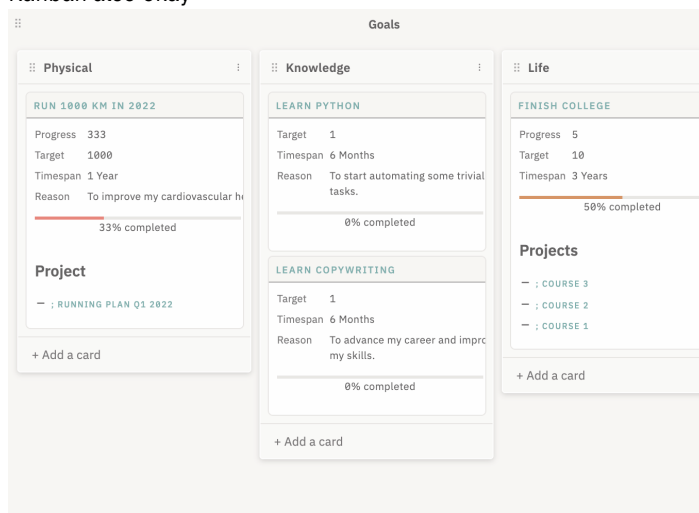

- OHHHH because the dashboard has CSS instructions

```
---
tags:
alias: Home
cssClasses: cards cards-1-1 table-wide
---
```
Dashboard

Also, I turned off "contextual typography" plugin that was meant for Minimal, not seeing a difference?

Primary Theme

Another I enjoy. Dash looks the same as default, less pretty list. Kanban is fine

Mobile Primary Theme

Blue Topaz Theme

I haven't used this in a while but it's okay at times. Kanban fine, dash is borked.

Ebullient Works

Personal fave. Dash isn't pretty but Kanban is fine

Golden Topaz

Also one I've liked for the colors. Kanban ok... kind of too close tone-on-tone stuff. Dash plain.
